ANNEX IV

Technical Documentation of High-Risk AI Systems

Regulation (EU) 2021/XXX of the European Parliament and of the Council

---

1. Document Control

Document ID: EUAIA-2026-7C96F57D
AI System Name: OMI
Version: 1.0
Entity Type: PROVIDER
Organization: SHG
Compliance Contact: Andrija
Classification: HIGH_RISK
Date Created: 24 Jan 2026, 14:34

2. System Overview

2.1 Intended Purpose

The system extracts structured data from de-identified medical reports to produce Excel files for downstream analytics. It does not make clinical decisions and is not a substitute for professional judgment.

2.2 Deployment Scope

Deployed for processing de-identified patient medical reports in healthcare and analytics environments. Users are instructed not to upload PHI/PII.

2.3 Forms in Which the System Is Placed

Delivered as a software solution for integration into clinical and analytics workflows.

2.4 Hardware Dependencies

test

2.5 Component of a Product

test

2.6 User Interface Overview

Includes a review UI displaying extracted fields, source snippets, and justification for human validation. Audit logs track reviewer actions and timestamps.

2.7 Instructions for Use

SignatureAPI Envelope ID: F6F29347-0362-46D8-A505-F108A45A0564 NULL AND VOID — NON-BINDING TEST DOCUMENT

Users must ensure input data is de-identified, verify outputs before use, and follow provided operational and incident reporting procedures.

3. Design and Development

3.1 Development Methods and Lifecycle

Development follows versioned pipelines with reproducible processes, seed control, and immutable artifacts. Change logs and impact assessments are maintained for retraining, rules, configuration, and infrastructure updates.

3.2 Design Specifications

Extraction targets predefined fields (e.g., T, N, M, Grade, biomarkers) from medical reports using OCR normalization and clinical lexicon handling. Label schema and data splits are versioned and documented.

3.3 System Architecture and Compute

test

3.4 Data Requirements and Datasets

Uses de-identified medical reports, stratified by cancer subtype, template, and modality. Datasets are governed by access controls, encrypted storage, and tracked lineage with unique IDs and hashes.

3.5 Human Oversight Measures

Low-confidence and exception cases are routed to human reviewers for validation. Dual-control is applied to critical fields, with full audit trails and escalation protocols for persistent failures.

3.6 Predetermined Changes Envelope

Triggers for retraining or redeployment include data drift, KPI decline, new templates, and security updates. All changes require approval and are logged with impact assessments.

3.7 Validation and Testing

Performance is validated using stratified test sets, scenario and stress tests, and field-level precision/recall/F1 metrics. Robustness is assessed via corruption, template-shift, and data drift monitoring.

3.8 Cybersecurity Measures

Data is encrypted at rest and in transit, with role-based access controls, input validation, schema checks, and SIEM monitoring. Incident reporting occurs within 24 hours.

4. Lifecycle, Risk, and Post-Market Assurance

4.1 Performance Metrics

SignatureAPI Envelope ID: F6F29347-0362-46D8-A505-F108A45A0564 NULL AND VOID — NON-BINDING TEST DOCUMENT

KPIs include field-level precision, recall, F1 scores, extraction latency, and throughput. Robustness is monitored under OCR noise, low DPI, and template variations.

4.2 Risk Management System

Risk management follows ISO 14971 principles, maintaining a risk register and applying preventive, detective, and corrective controls. Quarterly reviews and incident reporting are in place.

4.3 Lifecycle Changes

All retraining, configuration, and infrastructure changes are logged with versioning, impact assessment, and change board approval. Traceability links model versions, datasets, and code commits.

4.4 Standards and Specifications

Conforms to ISO/IEC 27001, ISO/IEC 27017/27018 (where applicable), ISO 9001-inspired QMS controls, and HIPAA de-identification standards. Secure SDLC practices are implemented.

4.5 EU Declaration of Conformity

The system is in conformity with Section 2 of the AI Act (Articles 8–15), covering risk management, data governance, human oversight, accuracy, robustness, cybersecurity, and post-market monitoring. Conformity was assessed via EU Type-Examination and QMS Assessment by Notified Body EUConformity NB Ltd. (NB 1234), certificate NB-1234-AI-2025-0001.

4.6 Post-Market Performance and Monitoring Plan

Post-release reviews include 30/60/90-day check-ins, quarterly audits, and corrective actions tracked in Jira. Data drift and KPI monitoring trigger retraining or redeployment as needed.

5. Declaration and Signatures

I, the undersigned, declare that the information provided in this technical documentation is accurate and complete to the best of my knowledge.

Name: _____

Position: _____

Date: _____

Signature: Selma Obradovic

#4e6dc7e5

6. Notes

This compliance report is generated based on the information provided and the current understanding of the EU AI Act requirements. Information providers remain responsible for ensuring ongoing

SignatureAPI Envelope ID: F6F29347-0362-46D8-A505-F108A45A0564 NULL AND VOID — NON-BINDING TEST DOCUMENT

compliance with all applicable regulations and requirements.

Audit Log

Envelope ID	F6F29347-0362-46D8-A505-F108A45A0564
Title	Signature request: Annex_IV_-_Technical_Documentation_1.0.pdf
Completed at	24/01/2026 14:42:59
Date format	Day / Month / Year
Time format	24-hour clock
Time zone	UTC

24/01/2026 14:42:28	The envelope has been created.
24/01/2026 14:42:29	Selma Obradovic (#4e6dc7e5) has been authenticated by SignatureApiMini: user_id: fdab9ea7-1d97-41c1-9b5f-2af26ead45bf As provided by the initiator of the electronic signature transaction.
24/01/2026 14:42:29	Selma Obradovic (#4e6dc7e5) has entered the signing platform from IP address 77.78.224.214.
24/01/2026 14:42:44	Selma Obradovic (#4e6dc7e5) has agreed to: By checking this box and clicking "Agree and Continue" below, I agree to use electronic records and signatures, I agree to conduct business electronically, and I confirm that I have received and read the [Electronic Records and Signature Disclosure]. The part enclosed in square brackets links to "Electronic Records and Signature Disclosure."
24/01/2026 14:42:57	Selma Obradovic (#4e6dc7e5) has agreed to: By selecting "Adopt and Sign", I agree that the above signature image will be the electronic representation of my signature for all purposes and has the same legal effect as my ink signature on paper.
24/01/2026 14:42:59	Selma Obradovic (#4e6dc7e5) has signed the documents with the name Selma Obradovic.
24/01/2026 14:42:59	The envelope has been completed.

The integrity of this document is protected by a cryptographic seal signed by Signature API, Inc.
