EU DECLARATION OF CONFORMITY

High-Risk AI System · Issued under the provider's sole responsibility

1. Document Control

Entity Type	PROVIDER
AI System Name	OMI
Version	v1
Risk Classification	HIGH_RISK
Organization	SHG
Compliance Contact	Andrija
Document ID	EUAIA-2026-4490A8D1
Date Created	24 Jan 2026, 14:37

2. System & Provider Information

AI System Type / Category	HIGH_RISK
Unique Reference / Traceability ID	EUAIA-2026-7C96F57D
Intended Purpose & Context	The system extracts structured data from de-identified medical reports to produce Excel files for downstream analytics. It does not make clinical decisions and is not a substitute for professional judgment.
Trade Name / Trademark	OMI
Registered Address	77 Market Street, New York, NY, USA
Contact	contact@example.com
Authorised Representative	SHG Europe Sàrl

Representative Address	29 Rue de la Loi, 1040 Brussels, Belgium

3. Conformity Statement

This AI system is in conformity with the requirements set out in Section 2 of the AI Act (Articles 8–15). Where applicable, this declaration also covers conformity with other relevant Union harmonisation legislation. The applicable acts are listed here:

Union Act / Instrument	Scope / Subject	References
Art. 9	Risk Management	Risk management follows ISO 14971 principles, maintaining a risk register and applying preventive, detective, and corrective controls. Quarterly reviews and incident reporting are in place.
	Data Governance	Uses de-identified medical reports, stratified by cancer subtype, template, and modality. Datasets are governed by access controls, encrypted storage, and tracked lineage with unique IDs and hashes.
	Human Oversight	Low-confidence and exception cases are routed to human reviewers for validation. Dual-control is applied to critical fields, with full audit trails and escalation protocols for persistent failures.
	Accuracy, Robustness, Cybersecurity	Performance is validated using stratified test sets, scenario and stress tests, and field-level precision/recall/F1 metrics. Robustness is assessed via corruption, template-shift, and data drift monitoring. Data is encrypted at rest and in transit, with role-based access controls, input validation, schema checks, and SIEM monitoring.
	Post-market Monitoring	Post-release reviews include 30/60/90-day check-ins, quarterly audits, and corrective actions tracked in Jira. Data drift and KPI monitoring trigger retraining or redeployment as needed.

4. Declaration & Personal Data Compliance

We, the undersigned provider, hereby declare under our sole responsibility that the AI system identified above fulfils the requirements listed below.

We, the undersigned provider, hereby declare under our sole responsibility that the AI system identified above fulfils the requirements listed below.

Status: Complied

5. Harmonised Standards / Common Specifications

This AI system is in conformity with the requirements set out in Section 2 of the AI Act (Articles 8–15). Where applicable, this declaration also covers conformity with other relevant Union harmonisation legislation. The applicable acts are listed here:

Identifier	Title	Applied Aspects / Clauses
ISO 14971	Medical devices — Application of risk management to medical devices	Risk management system for the AI system, including risk register, preventive, detective, and corrective controls.

6. Notified Body & Assessment Details

Notified Body Name	EUConformity NB Ltd.
Identification Number	1234
Assessment Procedure	EU Type-Examination + QMS Assessment (Annex VII-equivalent)
Certificate Identification	NB-1234-AI-2025-0001

7. Signatures & Footnotes

This document is generated based on the information provided and the current understanding of the EU AI Act requirements. Information providers remain responsible for ensuring ongoing compliance with all applicable regulations and requirements.
